

# MySource *mini*

Having defined web content management systems (CMS) for over a decade Squiz is proud to release a packaged hardware/software CMS appliance that allows you to easily plug and build your website or intranet.

- MySource Mini.

If you are looking to promote a new product or service with a micro site, MySource Mini hits the ground running with true plug-and-play installation and worry free automatic updates.

MySource Mini features the revolutionary Squiz-developed Viper editing interface for true inline WYSIWYG click-to-edit functionality that will empower you to easily create and manage content without technical skills or specialised training.

The MySource Mini appliance is no virtual pretender, it's the real deal.

# MySource *mini*

For one affordable price you can do more for less:

## Revolutionary Viper Editing Interface
